Subject: Prioritization of Publications

Dear all:
Attached is the current list of planned publications. This includes posters or manuscripts planned as part of a current WSA project as well as any other planned publications. As discussed during Monday's staff meeting, please review this information and provide me the following:

1) If there is a planned poster or manuscript not captured on this list, please provide me with the relevant information.
2) For all planned posters/manuscripts being developed by you or one of your reports, please assign it one of the 3 prioritizations: Required, High or Medium. As a reminder: publications in the "Required" category would include results of reduced harm product testing or results of new assay validation studies.

Please provide me your feedback by March 29th so that I can compile and circulate a prioritized list for the April 2 staff discussion.

Let me know if any questions.

Thanks,
Valerie
